BOOK SYNOPSIS

Building Social Relationships addresses the need for social skills programming for children and adolescents with autism spectrum disorders and other social difficulties by providing a comprehensive model that incorporates the following five steps: assess social functioning, distinguish between skill acquisition and performance deficits, select intervention strategies, implement intervention, and evaluate and monitor progress. The model describes how to organize and make sense of the myriad social skills strategies and resources available to parents and professionals. It is not meant to replace other resources or strategies, but to synthesize them into one comprehensive program.
