BOOK SYNOPSIS

Malik Toole rose to the top of the drug game in the 80s selling cocaine when the crack cocaine epidemic hit. He took everything he learned from being born and raised in the streets to become a millionaire by the time he was eighteen years old. It wasn't until he met Elisa, an upper middle class college girl from an upstanding family who would become his future wife, did he learn how to take his illegal earnings and make it appear his money was legit. During his rise there was one girl from his neighborhood named Trinity that he continued to deal with even after he married Elisa and another woman that helped take his drug game to the ultimate level. In The Coke Trilogy find out how one man's decision will have a domino effect of chaos that carries through each generation that might ultimately destroy Malik and everyone he loves.
